#### Sommario/riassunto

Contributions to this collection focus on the unity and diversity of the language of the Roma (Gypsies), the only Indic language spoken exclusively in Europe. Properties discussed include the distinct inflectional and derivational patterns applied to Asian and European lexical layers, the distribution of inflectional, agglutinative, and analytic formation among syntactic categories, regularities in the ongoing shift from inflectional to analytic case formation, suppletion, aspects of syntactic convergence, and patterns of morphological transitivization and de-transitivization (causatives and p
