

1. Record Nr.	UNINA9910457498803321
Autore	Sager Juan C
Titolo	A practical course in terminology processing [[electronic resource] /] / Juan C. Sager ; with a bibliography by Blaise Nkwenti-Azeh
Pubbl/distr/stampa	Amsterdam ; ; Philadelphia, : J. Benjamins Pub. Co., 1990
ISBN	1-283-42403-7 9786613424037 90-272-7434-7
Descrizione fisica	1 online resource
Altri autori (Persone)	Nkwenti-AzehBlaise
Disciplina	410/.285
Soggetti	Terms and phrases Information storage and retrieval systems Terms and phrases - Data processing Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [231]-254) and index.
Nota di contenuto	A PRACTICAL COURSE IN TERMINOLOGY PROCESSING; Title page; Copyright page; Acknowledgements; Table of contents; Chapter One. INTRODUCTION WHAT IS TERMINOLOGY?; 1.1 A new field of enquiry and activity; 1.2 Definition; 1.3 Terminology and related disciplines; 1.3.1 Terminology and Information Science; 1.4 Theoretical premises; 1.5 Requirements of an applied field of study; 1.6 Conflicts between theory and practice; 1.7 The purpose and structure of this book; Chapter Two. THE COGNITIVE DIMENSION; 2.1 A theory of reference; 2.1.1 A model of knowledge; 2.1.2 Subject disciplines 2.1.3 The social norm 2.1.4 Knowledge and reference; 2.1.5 Special subject languages; 2.1.6 Words, terms and standardised terms; 2.2 A theory of concepts; 2.2.1 Concepts: definition; 2.2.2 Characteristics; 2.2.3 Types of concepts; 2.2.4 Structures of concepts; 2.2.4.1. Relationships; 2.2.4.2. Complex relationships; 2.2.5 Subject classification; 2.3 Definitions and alternatives; 2.3.1 Definition of 'definition ' in terminology; 2.3.1.1 Scope of definitions; 2.3.2 Methods of definition; 2.3.2.1. Rules of definition; 2.3.3 Definitions in context 2.3.3.1. Definition as part of the semantic specification 2.3.4 The

purpose of definitions in terminology; 2.3.4.1. Functional types of definitions; 2.3.4.2. Needs analyses; 2.3.5 Use of existing definitions; 2.3.5.1. The need for terminological definitions; 2.4 Terminological definitions and relationships; 2.4.1 Complementarity of definition and relationships; Chapter Three. THE LINGUISTIC DIMENSION; 3.1 A theory of terms; 3.1.1 The onomasiological approach; 3.1.2 Terms and their forms; 3.1.2.1. Terms in dictionaries; 3.1.2.2. Homonyms, synonyms and variants; 3.1.2.3. Status of terms
3.1.3 Processes of terminologisation 3.2 Term formation: theory and practice; 3.2.1 Motivation for designation; 3.2.1.1. Names and proper nouns; 3.2.2 Patterns of term formation; 3.2.2.1. Use of existing resources; 3.2.2.2. Modification of existing resources; 3.2.2.3. Creation of new lexical entities (neologisms); 3.2.3 Pragmatic aspects of term formation; 3.2.3.1. Trends in secondary term formation; 3.2.3.2. Attitudes to borrowing; 3.2.4 Technical support for term creation; 3.3 Guidelines for the creation of terms; 3.3.1 International guidelines; 3.3.2 Criteria and rules for naming
3.4 Nomenclatural systems 3.4.1 General principles; 3.4.2 Features of medical nomenclature; 3.4.3 Features of biological nomenclature; 3.4.4 Features of chemical nomenclature; Chapter Four. 4.3.3 Objectives of standardisation of terminology

Sommario/riassunto

Since the advent of the computer, terminology management can be carried out by almost anyone who has learnt to use a computer. Terminology management has proved to be an efficient tool in international communications in industry, education and international organisations. Software packages are readily available and international corporations often have their own terminology database. Following these developments, translators and terminologists are confronted with a specialised form of information management involving compilation and standardisation of vocabulary, storage, retrieval and updating
