

1. Record Nr.	UNINA9910457504103321
Autore	Rostrup-Nielsen Jens <1939->
Titolo	Concepts in syngas manufacture [[electronic resource] /] / Jens Rostrup-Nielsen, Lars J. Christiansen
Pubbl/distr/stampa	London, : Imperial College Press, 2011
ISBN	1-283-43316-8 9786613433169 1-84816-568-4
Descrizione fisica	1 online resource (390 p.)
Collana	Catalytic science series ; ; v. 10
Altri autori (Persone)	ChristiansenLars J
Disciplina	541.395
Soggetti	Gas manufacture and works Synthesis gas Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 331-355) and indexes.
Nota di contenuto	pt. 1. Basic principles -- pt. 2. Steam reforming technology.
Sommario/riassunto	This book provides a general overview of syngas technologies as well as an in-depth analysis of the steam reforming process. Syngas is a mixture of hydrogen and carbon oxides which can be made from hydrocarbons, coal and biomass. It is an important intermediate in the chemical industry for manufacture of ammonia, methanol and other petrochemicals as well as hydrogen for refineries and fuel cells. Syngas is playing a growing role in the energy sector, because it can be converted into a number of important energy carriers and fuels. Syngas catalysis creates new options and flexibility in the com
