Sommario/riassunto	This book illuminates various aspects of a central but unexplored area of American history: the midcentury Japanese American experience. A vast and ever-growing literature exists, first on the entry and settlement of Japanese immigrants in the United States at the turn of the 20th century, then on the experience of the immigrants and their American-born children during World War II. Yet the essential question,

"What happened afterwards?" remains all but unanswered in historical literature. Excluded from the wartime economic boom and scarred psychologically by their wartime ordeal, the former camp inmates struggled to remake their lives in the years that followed. This volume consists of a series of case studies that shed light on various developments relating to Japanese Americans in the aftermath of their wartime confinement, including resettlement nationwide, the mental and physical readjustment of the former inmates, and their political engagement, most notably in concert with other racialized and ethnic minority groups.

Sommario/riassunto	In the Jewish tradition, it is incumbent upon every generation to attempt to find meaning in its history. Meaning is co-created within the

context of the inter-subjective field of a meeting of minds. Psychoanalysis, in some respects like the Jewish tradition from which it emerged, represents a body of thought about man's relation to himself and to others, and places great value on the influence of memory, narrative, and history in creating meaning within the dyadic relationship of analyst and patient. In *Answering a Question with a Question: Contemporary Psychoanalysis and Jewish Thought*, editors Aron and Henik have brought together an international collection of contemporary scholars and clinicians to address the interface and the mutual influence of Jewish thought and modern psychoanalysis.
