Sommario/riassunto

With recent clinical advances, millions of people survive many years after a cancer diagnosis. And while their physicians deliver conventional, evidence-based therapies to treat the cancer, sometimes the cancer patient and his or her symptoms are not treated with equal skill. To manage their physical and emotional symptoms and promote health and well-being, most cancer patients and survivors use complementary therapies: Naturopathy, Ayurveda, herbalism, homeopathy, hypnosis, yoga, acupuncture, music therapy, macrobiotics, chelation therapy, colonics, hydrotherapy and many, many more. But ... are
