| Nota di contenuto | pt. 1. Processes and systems -- pt. 2. Leaders and leadership. |
| Sommario/riassunto | This collection of new contributions from psychoanalysts, group analysts and organisational consultants from Europe, Australia and the United States examines the patterns of conscious and unconscious life of those organisations in which traumatic experience is ubiquitous. Among the organisations studied are hospitals and clinics for the care and treatment of the mentally ill and the intellectually disabled; prisons; international industrial and financial firms; trade unions; universities and institutes for training mental health professionals; and churches. Drawing from Freudian, Kleinian, Inde |
