Kay -- Appendix. Statistical charts of Pentecostalism in Europe.

**Sommario/riassunto**

Starting from small numbers before 1914, the Pentecostal and charismatic movement now comprises nearly one third of the whole of the global Christian population. Scholarly accounts of Pentecostal and charismatic congregations in various countries have been written but this book does something new. It provides an interconnected account of Pentecostalism in Europe, something never before been attempted because of the diversity of languages spoken across the continent. This book shows how Pentecostalism spread from the north of Europe and how it fared during two horrific wars and under communist dictatorships. In doing so it provides new theological, historical and sociological information about Pentecostal churches in eastern and southern Europe, about the Catholic Charismatic Movement and about the state of western groupings.

Sommario/riassunto	The main aim of the work is to present emblematics in Hungary in its European context, and to show the reciprocal influence between that phenomenon and mainstream literature. The description of the theoretical and historical development in Hungary is supplemented by a series of case studies examining the effect of emblematics upon various literary genres. The final chapter analyzes the link between literary emblematics and the visual arts by looking at a specific example. As in most European countries, emblematics in Hungary is part of a complex labyrinth of literary modes of thought and expression. A relative poverty of theoretical writing went hand in hand with a considerable range of emblematic practice. The emblem proved to be a transitional form between the period when signs and motifs were regarded as having specific and fixed meanings and the modern period when we have developed a different and shifting concept of language and meaning. At the same time as emblems began to penetrate the more popular levels of national culture and literature, they also became more specialized. Hungarian emblematics used, for the most part, existing pictorial and textual combinations of pictures and texts. They employed the emblem notably in genres and texts of the genus <i>demonstrativum</i> , which referred to matters which were topical at the time.
