Sommario/riassunto

Comment repenser le concept de société civile hors du prisme des valeurs libérales et séculières caractéristiques de l'Occident ? En conjuguant étroitement les savoirs et méthodes de l'anthropologie et de la science politique, le présent recueil traite de cette question centrale à l'étude de contextes nationaux sud-est asiatiques (Thaïlande, Birmanie, Cambodge, Malaisie, secondairement Singapour et Indonésie) dont les modes d'actions politiques restent profondément empreints de hiérarchie et d'idéologie religieuse. Les diverses formes de dirigisme étatique prenant appui sur ces cadres culturels hérités entrent aujourd'hui en confrontation directe avec des modèles d'action citoyenne importés d'Occident, dans le cadre de la mondialisation économique et informationnelle. En examinant, sur la base d'enquêtes de terrain et d'une abondante documentation, les modalités et les enjeux de cette confrontation suivant les pays et leur histoire, l'ouvrage offre une interprétation approfondie des événements qui font leur actualité tout en questionnant leur devenir. Il s'adresse tout autant aux chercheurs en sciences sociales qui s'intéressent à la nature des sociétés civiles non occidentales, qu'à un public plus large, soucieux de mieux comprendre l'Asie du Sud-Est, ses cultures et les défis sociopolitiques qu'elle doit relever. How to rethink the concept of civil society outside the narrow prism of liberal and secular Western values? By closely combining the knowledge and methods of anthropology and of political sciences, the book deals with this epistemological issue through case studies of southeast Asian countries (Thailand, Burma, Cambodia, Malaysia, and to a lesser extent Singapore and Indonesia), whose modes of political action remain inscribed with hierarchy and religious ideologies. The various forms of authoritarian states built on these cultural frameworks are now increasingly conflicting with democratic models adapted from the West, as a result of economic...

## Sommario/riassunto

Wissensökonomie, entgrenzte Netzwerkgesellschaft - im globalen Zeitalter hat sich die räumliche Organisation wirtschaftlicher Prozesse radikal gewandelt. In diesem Buch blicken renommierte Wirtschaftsgeographen auf diese Veränderungen und entwerfen Alternativen zu dominierenden neoklassisch inspirierten Positionen. Im Dialog mit der Wissenschaftsphilosophie, den Kulturwissenschaften, der heterodoxen Ökonomik und der Organisationssoziologie werden zentrale Themen wie kulturelle Ökonomie, Netzwerke und Evolution verhandelt. Der Band wird damit zum Plädoyer für einen pluralistischen, transdisziplinären Zugang zu den vielfach gebrochenen Geographien einer globalisierten Ökonomie. Mit Beiträgen von Ash Amin, Trevor Barnes, Gernot Grabher und Ron Martin.
