AIDS and Empire: Accusation in the Periphery -- 21. Blame, Cause, Etiology, and Accusation -- 22. Conclusion: AIDS and an Anthropology of Suffering -- Notes -- Bibliography -- Index
Sommario/riassunto	Does the scientific "theory" that HIV came to North America from Haiti stem from underlying attitudes of racism and ethnocentrism in the United States rather than from hard evidence? Award-winning author

and anthropologist-physician Paul Farmer answers with this, the first full-length ethnographic study of AIDS in a poor society. First published in 1992 this new edition has been updated and a new preface added.
