Sommario/riassunto	This is a clear and accessible exploration of feminist method, methodology and epistemology. After situating herself and her work, Gayle Letherby charts the debates concerned with the epistemological, political and practical issues involved in doing feminist research, and places the debates within a wider consideration of the status of knowledge. The main focus of the book is then the particular and practical issues for feminist researchers. It examines how the process of research affects the results of that research and explores the relation between politics and practice in terms of research
