Sommario/riassunto

This publication provides a contextual view of innovations in public governance. Public governance is about coordination and the use of various forms of institutional arrangements in policy-making processes to pursue the common good. In practice, the improvements and radical changes in governance structures and processes are met through ""governance innovations"", which vary from radical large-scale national reforms to various organizational innovations and new e-enabled governance models. Understanding and managing such innovation processes are among the most burning issues in public administ
