| 1. Record Nr. | UNINA9910457644003321 |
| Titolo | Membrane engineering for the treatment of gases [[electronic resource]] . Volume 1 Gas-separation problems with membranes // edited by Enrico Drioli and Giuseppe Barbieri |
| Pubbl/distr/stampa | Cambridge, : RSC Pub., 2011 |
| ISBN | 1-84973-347-3 |
| Descrizione fisica | 1 online resource (319 p.) |
| Collana | Membrane engineering for the treatment of gases ; ; v. 1 |
| Altri autori (Persone) | DrioliE BarbieriGiuseppe |
| Disciplina | 660.28424 |
| Soggetti | Membranes (Technology) Gas separation membranes Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | i-iv; v-viii; ix-xx; 1-28; 29-57; 58-83; 84-124; 125-149; 150-195; 196-214; 215-244; 245-275; 276-298 |
| Sommario/riassunto | Membranes already have important applications in artificial organs, the processing of biotechnological products, food manufacture, waste water treatment, and seawater desalination. Their uses in gaseous mixture separations are, however, far from achieving their full potential. Separation of air components, natural gas dehumidification and sweetening, separation and recovery of CO ₂ from biogas, and H ₂ from refinery gases are all examples of current industrial applications. The use of membranes for reducing the greenhouse effect and improving energy efficiency has also been suggested. New process |
