Edizione	[1st ed.]
Descrizione fisica	1 online resource (234 p.)
Altri autori (Persone)	McLaffertyElla HendryCharles
Disciplina	618.97/0231
Soggetti	Geriatric nursing Aging - Physiological aspects Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Growing older -- Theories of ageing -- Maintaining a safe environment -- Communicating -- Breathing -- Eating and drinking -- Eliminating -- Controlling body temperature -- Mobilising -- Expressing sexuality -- Sleeping -- Final thoughts on ageing.
Sommario/riassunto	The Physiological Effects of Ageing is a comprehensive resource for all nurses working with older people, enabling them to apply their knowledge of the ageing process to their practice, and, in doing so, enhance care delivery. This book emphasizes the normal ageing changes before considering possible effects of ageing on body systems, using as its framework Roper, Logan and Tierney's activities of living. Although problems associated with ageing are identified, nursing assessment and interventions are considered which can help reduce the impact these changes have on a person's functiona
