

1. Record Nr.	UNINA9910457692103321
Titolo	Systemic treatment of prostate cancer [[electronic resource] /] / edited by Alan Horwich
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2010
ISBN	0-19-174025-X 0-19-960737-0 1-283-34833-0 9786613348333 0-19-157581-X
Descrizione fisica	1 online resource (102 p.)
Collana	Oxford oncology library
Altri autori (Persone)	HorwichAlan
Disciplina	616.9946306
Soggetti	Prostate - Cancer - Diagnosis Prostate - Cancer - Treatment Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Preface; Symbols and abbreviations; Contributors; 1 Biological principles of hormone therapy; 2 PSA as a marker of progression and response in advanced prostate cancer; 3 Neo-adjuvant and adjuvant hormone therapy for high-risk localized prostate cancer; 4 Systemic treatment of recurrence after local therapies; 5 First-line hormone therapy for metastatic prostate cancer; 6 Second- and third-line hormone therapies; 7 Chemotherapy for metastatic prostate cancer; 8 The role of bisphosphonates in the systemic treatment of prostate cancer; 9 Systemic isotope therapy of bone metastasis 10 Biological targets and new drug development for prostate cancer Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; R; S; T; U; V; W; Z
Sommario/riassunto	Prostate cancer is one of the commonest cancers in men in the western world, and the prevalence is rising currently due to improvements in screening and treatment. Serum PSA represents a useful marker of disease. It has frequently a long natural history, creating the opportunities for multiple sequential therapeutic interventions. For patients with high risk local disease or with metastases, endocrine

therapy is central to management. Hormone ablation has long been the mainstay of endocrine therapy in this group of patients, though anti-androgens, oestrogens and corticosteroids can also cause regression.

Swan John <d. 1671.>

Speculum mundi, or, A glass representing the face of the world
[[electronic resource]] : shewing both that it did begin and must also end, the manner how, and the time when, being largely examined : the whole of which may be fitly called an hexameron, or discourse of the clauses, continuance, and qualities of things in nature : occasioned as matter pertinent to the work done in the six days of the worlds creation // by John Swan
