Collana	Cambridge studies in advanced mathematics ; ; 98
Disciplina	516.3/73
Soggetti	Geometry, Riemannian
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references (p. 449-464) and indexes.
Nota di contenuto	; I. Riemannian manifolds -- ; II. Riemannian curvature -- ; III. Riemannian volume -- ; IV. Riemannian coverings -- ; V. Surfaces -- ; VI. Isoperimetric inequalities (constant curvature) -- ; VII. The kinematic density -- ; VIII. Isoperimetric inequalities (variable curvature) -- ; IX. Comparison and finiteness theorems.
Sommario/riassunto	This book provides an introduction to Riemannian geometry, the geometry of curved spaces, for use in a graduate course. Requiring only an understanding of differentiable manifolds, the author covers the introductory ideas of Riemannian geometry followed by a selection of more specialized topics. Also featured are Notes and Exercises for each chapter, to develop and enrich the reader's appreciation of the subject. This second edition, first published in 2006, has a clearer treatment of many topics than the first edition, with new proofs of some theorems and a new chapter on the Riemannian geometry of surfaces. The main themes here are the effect of the curvature on the

usual notions of classical Euclidean geometry, and the new notions and ideas motivated by curvature itself. Completely new themes created by curvature include the classical Rauch comparison theorem and its consequences in geometry and topology, and the interaction of microscopic behavior of the geometry with the macroscopic structure of the space.

Sommario/riassunto

"This collection brings together an eclectic range of prominent scholars in architecture, education, history, law, literary criticism, and cultural studies to explore how the field of childhood studies questions some of the most basic tenets of humanities scholarship-and to consider how these questions can bridge disciplines. Each essay pairs childhood studies with another field of inquiry to ask explicitly how foregrounding the child reorients long-established scholarly foundations in that field. Childhood studies' insistence that we need to rethink the symbolic work of the child necessarily realigns a host of other fields that, often uncritically, draw upon the false dichotomy separating the vulnerable, dependent child from the allegedly independent and autonomous adult. By complicating our assumptions about the child, we are also providing a new way of thinking through some of the most basic tenets of the humanities. Anna Mae Duane notes that much of the exciting work in the humanities seeks to recover the voices of those who have been infantilized, including women, people of color, and the GLBT community. This volume features thirteen essays by leading scholars who reveal how childhood studies offers a vital methodological and theoretical roadmap for engaging issues that are among the most important and provocative in the humanities-the recovery of colonized voices, the definition of agency, the performance of identity, and the construction of gender and race, to name a few. Each of the essays seeks to understand how rhetorical views of childhood shape views of power, politics, knowledge, and sociality"--
