Sommario/riassunto	This book presents the proceedings of the 21st European Young Geotechnical Engineers Conference, held in the Netherlands in September 2011. Six sections cover the topics of: underground construction; pile foundation and ground improvement; soil dynamics; dams, erosion and piping; deformation and soil properties and geothermics. The papers included here present the new and refreshing perspective of young engineers exploring the field of geotechnics. Geotechnical engineering aims to contribute to sustainable living and to the creation of safe, economic and pleasant spaces to live, work and relax

Sommario/riassunto	This book constitutes the refereed proceedings of the 13th International Conference on Cryptology and Network Security, CANS 2014, held in Heraklion, Crete, Greece, in October 2014. The 25 revised full papers presented together with the abstracts of 3 invited talks were carefully reviewed and selected from 86 submissions. The papers cover topics of interest such as encryption; cryptanalysis;

malware analysis; and privacy and identification systems as well as various types of network protocol design and analysis work.
