| Sommario/riassunto      | At last, we have the scientific evidence that documents the many biological gender differences that influence learning. For instance, girls talk sooner, develop better vocabularies, read better, and have better fine motor skills. Boys, on the other hand, have better auditory memory, are better at three-dimensional reasoning, are more prone to explore, and achieve greater abstract design ability after puberty. In this profoundly significant book, author Michael Gurian synthesizes the current knowledge and clearly demonstrates how this distinction in        |
