Sommario/riassunto

Indian English, or rather, the forms of English used in India, have long been a topic of interest for laymen and scholars. It was only from the 1960's onwards that the local forms of English were recognized for what they are - adaptations of the world language to local needs, and varying to an enormous degree, depending on the speakers' (and writers') education and the uses they make of the language. This acknowledgement came mainly from abroad (and still does)
