

1. Record Nr.	UNINA9910457901003321
Autore	Lynch Martin
Titolo	Mining in World History [[electronic resource]]
Pubbl/distr/stampa	London, : Reaktion Books, 2004
ISBN	1-280-49361-5 9786613588845 1-78023-005-2
Descrizione fisica	1 online resource (352 p.)
Collana	RB-Globalities
Disciplina	338.209 622.09
Soggetti	Mineral industries -- History Mines and mineral resources -- History Mining engineering -- History Smelting -- History Business & Economics Mechanical Engineering Engineering & Applied Sciences Industries Mining Engineering Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Mining in World History Cover; Imprint page; Contents; Preface; Prologue; 1. The Metallurgical Renaissance; 2. The Watt Engine; 3. New Frontiers; 4. The Copper Barons; 5. The Gold Factories; 6. Mass Production; Epilogue; References; List of Maps; Index
Sommario/riassunto	This book deals with the history of mining and smelting from the Renaissance to the present. Martin Lynch opens with the invention, sometime before 1453, of a revolutionary technique for separating silver from copper. It was this invention which brought back to life the rich copper-silver mines of central Europe, in the process making brass cannon and silver coin available to the ambitious Habsburg emperors, thereby underpinning their quest for European domination. Lynch also

discusses the Industrial Revolution and the far-reaching changes to mining and smelting brought about by the steam
