Newbery -- Challenges for macroeconomic policy in EMU / Francesco Giavazzi -- The integration of EU banking markets / Jordi Gual.
Sommario/riassunto	This succinct book provides a broad panorama of the key economic policy challenges facing the European Union today. The enlargement of the EU and its lacklustre performance over the last decade in terms of employment and productivity growth have prompted wide-ranging calls for economic reform, both at the EU level and within member states. This volume brings together several leading thinkers in the key areas of policy under discussion, ranging from the institutional design of the

enlarged EU for efficient policy making, to the extent and nature of the integration process in markets such as those of energy and financial services. It includes an analysis of the problems of macroeconomic policy co-ordination in the EU and an analysis of the reforms in the labour markets and welfare state institutions. Timely and authoritative, this book is accessibly written and will appeal to a wide policy audience.
