Sommario/riassunto	Over the last two decades, the study of languages and writing systems and their relationship to literacy acquisition has begun to spread beyond studies based mostly on English language learners. As the worldwide demand for literacy continues to grow, researchers from different countries with different language backgrounds have begun examining the connection between their language and writing system and literacy acquisition. This volume is part of this new, emerging field of research. In addition to reviewing psychological research on reading (the author's specialty), the reader is introduced t
