Semantics; Chapter 8. Language and Thought; Chapter 9. Biological Prerequisites; Chapter 10. First Language Acquisition; References; Index
Sommario/riassunto	This textbook is designed to serve as an introduction to the interdisciplinary field of psycholinguistics. It is directed at filling the reading needs of courses in departments of linguistics and of psychology, presenting an integrated overview of the ways in which both disciplines have investigated the learning, production, comprehension, storage and recall of natural languages. Also detailed are those research topics that have captured the interests of psycholinguists over the past few decades. Some current topics included are modularity vs interactionism, the role of parsing strategies in s
