Sommario/riassunto	South Africa's provincial education departments have been reduced to provincial administrations, for reasons that include the powerful role national government plays in delivering education services. This book looks in detail at education spending and asks: Can we afford to maintain administrations that cannot possibly change the course of poor quality education and engineer a brighter future for our poor and deprived learners? The authors believe this question and the future role of provincial education departments need to be discussed, openly and

publicly, without delay.
