	Sommario/riassunto	In Emanuel Adler's distinctive constructivist approach to international relations theory, international practices evolve in tandem with collective knowledge of the material and social worlds. This book - comprising a fresh selection of his journal publications, a substantial new introduction, three previously unpublished articles - points IR constructivism in a novel direction, characterized as 'communitarian'. Adler's synthesis does not herald the end of the nation-state; nor does it suggest that agency is unimportant in international life. Rather, it argues that what mediates betwee

Intercultural Communication in Sarawak: Language Use of the Chinese-Speaking Communities / Ting, Su-Hie --

Sommario/riassunto	Malaysia has long been a melting pot of various cultures and ethnicities, including the three largest populations, the Malay, Chinese, and Indians. Despite this, efforts to implement multilingualism, advocated by language educators and policy makers, have been marred by political and religious affiliations. Drawing on two decades of field research, this timely analysis of language variation in Malaysia is an important contribution to the understanding not only of linguistic pluralism in the country, but also of the Indian Diaspora, and of the effects of language change on urban migrant populations. The research presented here will be of interest to scholars of Southeast Asian and South Asian Studies.
