| Sommario/riassunto      | The rise of information and communication technologies in the past decades has facilitated major economic development. It has expanded access to financial resources to empower the poor. It has even given                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

tools to government to detect and monitor criminal activity. Computers systems have been developed that can automatically flag and react to suspicious transactions, allowing law enforcement to better protect the market from abuses from petty fraud to terrorist activity. In sum, these new technologies offer great opportunities to improve and protect the lives of people everywhere. Paradoxically

| Sommario/riassunto      | Several use cases and services are defined, namely, handover between heterogeneous networks, home energy management system, software-defined radio access networks (SDRANs), radio resource management (RRM), and device-to-device (D2D) communication service that need to be implemented in conjunction with the media independent services (MIS) framework as specified in IEEE Std 802.21(TM)-2017. |
