

1. Record Nr.	UNINA9910458217503321
Titolo	Recommendations for seismic design of hybrid coupled wall systems [[electronic resource] /] / prepared by Technical Committee on Composite Construction, the Structural Engineering Institute (SEI) of the American Society of Civil Engineers ; edited by Sherif El-Tawil ... [et al.]
Pubbl/distr/stampa	Reston, VA, : SEI/America Society of Civil Engineers, c2010
ISBN	0-7844-7307-2
Descrizione fisica	1 online resource (81 p.)
Altri autori (Persone)	El-TawilSherif
Disciplina	693.8/52
Soggetti	Concrete walls - Design and construction Reinforced concrete construction - Design and construction Earthquake resistant design Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [60]-68)and index.
Nota di contenuto	""Contents""; ""List of Figures""; ""List of Tables""; ""List of Variables""; ""1 Introduction""; ""1.1 Application""; ""1.2 Scope""; ""2 System Behavior, Analysis, and Design Considerations""; ""2.1 Selection of Coupling Ratio""; ""2.2 Analysis Models for HCWs""; ""2.2.1 Equivalent Frame Models""; ""2.2.2 Finite Element Models""; ""2.3 System Design Philosophy""; ""3 Prescriptive Design Method (PrDM)""; ""3.1 Classification According to Current Provisions""; ""3.2 System Analysis""; ""3.2.1 Wall Model""; ""3.2.2 Coupling Beam Model""; ""3.2.3 Beam-Wall Connection Model"" ""3.3 Vertical Redistribution of Coupling Beam Forces""""3.4 Beam and Wall Overstrength""; ""3.5 Design Process""; ""4 Performance-Based Design Method (PBDM)""; ""4.1 Performance Objectives""; ""4.2 Recommended Analysis Methods""; ""4.3 Modeling Guidance""; ""4.3.1 Load Model""; ""4.3.2 Component Force-Deformation Response for Nonlinear Analysis Procedures""; ""4.3.3 Simplified Model for Nonlinear Static Procedure""; ""4.4 Preliminary Proportioning""; ""4.4.1 Method of Determining Trial Proportioning for HCWs""; ""4.5 Acceptance Criteria""; ""4.5.1 Coupling Beams""

""4.5.2 Reinforced Concrete Wall Piers""""4.5.3 Beam-Wall Connection"";  
""4.6 Design Process""; ""5 Component Design""; ""5.1 Coupling Beam  
Design""; ""5.1.1 Composite versus Non-Composite Coupling Beams"";  
""5.1.2 Coupling Beam Bracing""; ""5.2 Beam-Wall Connection Design"";  
""5.2.1 Embedment Length Calculation""; ""5.2.2 Wall Boundary Regions  
at Beam Embedment""; ""5.2.3 Top Beam-Wall Connections""; ""5.2.4  
Joint Constructibility Issues""; ""5.3 Wall Pier Design""; ""5.3.1 Flexural  
and Axial Strength Interaction""; ""5.3.2 Base Shear Magnification"";  
""5.3.3 Wall Shear Strength""  
""5.3.4 Special Detailing of Shear Wall Boundary Elements""""5.3.5 Force  
Transfer at Base of Wall""; ""6 Alternative Hybrid Wall Systems""; ""6.1  
Unbonded Post-Tensioned Coupled Wall Systems""; ""6.2 Steel Coupling  
Beam with Fuse""; ""6.3 Composite Shear Plate Coupling Beam"";  
""Appendix I: Development of Fundamental Wall Geometry"";  
""Appendix II: References""; ""Index""; ""A""; ""B""; ""C""; ""D""; ""E""; ""H"";  
""M""; ""O""; ""P""; ""R""; ""S""; ""W""; ""X""
