Sommario/riassunto

This encyclopaedia has been planned to serve as a convenient source of knowledge and information on a wide range of topics concerning elementary education. It seeks to describe things as they have been in past as they are at present and as they are likely to develop in future. Education today is the backbone of all developing societies. The issues of quality in education has become a major issue of the twenty first century. Educated skilled and technical trained people are the capital of a developing country. All the aspects have been dealt with specific reference to the socio cultural context
