| Sommario/riassunto      | Examining how far everyday life was possible in a situation of total war and brutal occupation, this book's theme is the social experience of occupation in German- and Italian-occupied Europe, and in particular the strategies ordinary people developed in order to survive. It adopts a comparative approach, and also discusses the Second World War. |

New Governance Models for Discoveries of Vaccine Science -- 7. Science and Insights from the Humanistic Disciplines -- 8. Conclusion.  |
| Sommario/riassunto      | This book focuses on enhancing management theories of Knowledge-Intensive Organizations (KIOs), analyzing academic and research institutions and multilateral agencies such as the World Health Organization (WHO). The first part of the book discusses the trusteeship norms of academic KIOs and institutional barriers that generate bias in selecting the research agenda. The author then discusses how moral stakeholders affect a legitimate research scope, and research policies and academic KIOs address the issues. Finally, the book addresses how to control private incentives that stem from ownership components as well as ways to build alliance and |

governance mechanisms for this purpose. This work provides researchers with a discussion of the broader impacts of addressing global common goods from responsible KIO perspectives.
