| Sommario/riassunto | Drawing on various disciplinary perspectives, this book re-focuses the debate on what makes a good health system, with a view to clarifying the uses of social science research in thinking about health care issues in Africa. The explosion of the HIV/AIDS pandemic, the persistence of malaria as a major killer, and the resurgence of diseases like tuberculosis which were previously under control, have brought about changes in the health system, with implications for its governance, especially in view of the diminished capacity of the public health facilities to cope with a complex range of expande |
