| Sommario/riassunto | Travelling Models offers a theoretical concept for comparative research on conflict management in Africa in processes of globalization: how is change in one place related to developments in other places? Why are certain issues that are important in one place taken up in other places, while others are not? The authors examine how the travel of models enact changes, particularly in African conflict situations, most often in unexpected ways. They look at what happens when a model has been put into practice at a conflict site, and they pay attention to the forms of social (re-)ordering resulting from this process. The authors look, among others, at conflict managing models of power- and revenue sharing, mediation, freedom of expression, disaster management, community involvement and workshopping.
