Sommario/riassunto	Robert Grosseteste (c.1170-1253) was an English statesman, philosopher, theologian, and bishop of Lincoln, and also one of the most controversial figures in his country's episcopate. His long life coincided with the central period of institutional, intellectual, and religious consolidation in medieval Europe and his letters provide important insights into the practices and preoccupations of the English clergy and laity in the first half of the thirteenth century. This volume contains the first complete translation of Grosseteste's collected Latin letters and shows that these were most likely chosen and arranged by Grosseteste himself. Shedding light on some of the period's crucial debates on issues of theology, law, pastoral care, and episcopal authority, Frank Mantello and Joseph Goering's richly annotated English translation makes his letters more accessible than ever for scholars and

students, and for those interested in medieval history, religion, and culture.
