Sommario/riassunto	This collection of selected papers addresses theoretical and empirical issues related to lexical categories, categorization and category change. Any grammatical description makes use of parts-of-speech. The proper set of lexical categories and the definitions of their properties cross-linguistically has been a remnant issue in linguistics since the beginnings of grammatical description. Besides, the traditional classification of lexical classes with their morphological, syntactic and/or inter...

Sommario/riassunto	This standard replaces IEEE Std 1073.3.2-2000. A connection-oriented transport profile and physical layer suitable for medical device communications in legacy devices is established. Communications services and protocols consistent with specifications of the Infrared Data Association are defined. These communication services and protocols are optimized for use in patient-connected bedside medical devices.
