Sommario/riassunto	How did the events of September 11, 2001 come to be thought of as 9/11? The Shock of the News is an authoritative account of post-9/11 political and social processes, offering an in-depth analysis of the media coverage of this momentous event. Brian Monahan demonstrates how 9/11 has been transformed into a morality tale centered on patriotism, victimization, and heroes. Introducing the idea of "public drama" as a way of making sense of how media processed and packaged the 9/11 attacks for their audiences, Monahan not only illuminates how and why the coverage took shape as it did, but also

provides us with new insights into the social, cultural, and political consequences of the attacks and their aftermath. Monahan explains how and why 9/11 became such a potent symbol, exploring how meanings and symbols get created, reinforced, and disseminated in modern society. Ultimately, Monahan offers an important new understanding of this singular event of our time, and his compelling narrative brings the momentous events back into focus.

Sommario/riassunto

This book reports significant progress of scientific research on

horseshoe crabs, including aspects of evolution, genetics, ecology, population dynamics, general biology and physiology, within the recent 10 years. It also highlights the emerging issues related to world-wide conservation threats, status and needs. The contributions in this book represent part of an ongoing global effort to increase data and concept sharing to support basic research and advance conservation for horseshoe crabs.
