Sommario/riassunto

The Pacific region presents a huge diversity of cultural forms, which have fuelled some of the most challenging ethnographic work undertaken in the discipline. But this challenge has come at a cost. Culture, often reconfigured as 'custom', has often served to trap the people of the Pacific in the past of cultural reproduction, where everything is what it has always been, or worse-outdated, outmoded and destined for modernization. Pacific Futures asks how our understanding of social life in the Pacific would be different if we approached it from the perspective of the futures
