Nota di contenuto	Introduction: theoretical and methodological approach -- Violence against Latina immigrants and immigration law -- Formal barriers to citizenship -- Informal barriers to citizenship -- Resisting inequality -- Conclusion.
Sommario/riassunto	Caught between violent partners and the bureaucratic complications of the US Immigration system, many immigrant women are particularly vulnerable to abuse. For two years, Roberta Villalón volunteered at a nonprofit group that offers free legal services to mostly undocumented immigrants who had been victims of abuse. Her innovative study of Latina survivors of domestic violence explores the complexities at the intersection of immigration, citizenship, and violence, and shows how inequality is perpetuated even through the well-intentioned delivery of vital services. Through archival research, participant observation, and personal interviews, Violence Against Latina Immigrants provides insight into the many obstacles faced by battered immigrant women of color, bringing their stories and voices to the fore. Ultimately, Villalón proposes an active policy advocacy agenda and suggests possible

changes to gender violence-based immigration laws, revealing the complexities of the lives of Latina immigrants as they confront issues of citizenship, gender violence, and social inequalities.

Sommario/riassunto

This is a third edition of the popular book, which presents an overview of the most recent findings in the biology of neutrophils. These cells are critically important for protection against bacterial and viral infections and have been recently demonstrated to be a major contributor to tumor associated immune suppression. In addition, neutrophils represent a unique model for studying fundamental questions of cellular biochemistry and molecular biology. This monograph provides a detailed description of signal transduction, generation of reactive oxygen, and mechanisms of migration and death of

Sommario/riassunto	The Fear of French Negroes is an interdisciplinary study that explores how people of African descent responded to the collapse and reconsolidation of colonial life in the aftermath of the Haitian Revolution (1791-1845). Using visual culture, popular music and dance, periodical literature, historical memoirs, and state papers, Sara E. Johnson examines the migration of people, ideas, and practices across imperial boundaries. Building on previous scholarship on black

internationalism, she traces expressions of both aesthetic and experiential transcolonial black politics across the Caribbean world, including Hispaniola, Louisiana and the Gulf South, Jamaica, and Cuba. Johnson examines the lives and work of figures as diverse as armed black soldiers and privateers, female performers, and newspaper editors to argue for the existence of "competing inter-Americanisms" as she uncovers the struggle for unity amidst the realities of class, territorial, and linguistic diversity. These stories move beyond a consideration of the well-documented anxiety insurgent blacks occasioned in slaveholding systems to refocus attention on the wide variety of strategic alliances they generated in their quests for freedom, equality and profit.
