

1. Record Nr.	UNINA9910458651703321
Autore	Auzinsh Marcis
Titolo	Optically polarized atoms [[electronic resource] ] : understanding light-atom interactions / / Marcis Auzinsh, Dmitry Budker, Simon Rochester
Pubbl/distr/stampa	Oxford, : New York, : Oxford University Press, 2010
ISBN	1-282-76816-6 9786612768163 0-19-157654-9
Descrizione fisica	1 online resource (389 p.)
Altri autori (Persone)	BudkerDmitry RochesterSimon
Disciplina	539.7
Soggetti	Atoms Physical optics Polarization (Light) Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [360]-367) and index.
Nota di contenuto	Contents; List of acronyms; PART I: INTRODUCTION TO LIGHT-ATOM INTERACTIONS; PART II: ADVANCED TOPICS; Appendix A: Constants, units, and notations; Appendix B: Units of energy, frequency, and wavelength; Appendix C: Reference data for hydrogen and the alkali atoms; Appendix D: Classical rotations; Appendix E: Nonlinear magneto-optical rotation with hyperfine structure; Appendix F: The Atomic Density Matrix software package; Bibliography; Index
Sommario/riassunto	This book is addressed at upper-level undergraduate and graduate students involved in research in atomic, molecular, and optical Physics. It will also be useful to researchers practising in this field. It gives an intuitive, yet sufficiently detailed and rigorous introduction to light-atom interactions with a particular emphasis on the symmetry aspects of the interaction, especially those associated with the angular momentum of atoms and light. The book will enable readers to carryout practical calculations on their own, and is richly illustrated with examples drawn from current research topic
