

1. Record Nr.	UNINA9910458671803321
Autore	Doody J. P
Titolo	Saltmarsh conservation, management and restoration [[electronic resource] /] / J. Pat Doody
Pubbl/distr/stampa	Dordrecht ; ; London, : Springer, 2008
ISBN	1-281-13032-X 9786611130329 1-4020-5748-2
Edizione	[1st ed. 2008.]
Descrizione fisica	1 online resource (236 pages)
Collana	Coastal systems and continental margins ; ; v. 12
Disciplina	577.69
Soggetti	Salt marshes Salt marsh ecology Coastal zone management Wetland restoration Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Human Influences -- Nature Conservation -- States and Values -- The Physical States -- Physical States, Restoration Methods -- Vegetation States -- Grazing Management -- Spartina -- Conclusions.
Sommario/riassunto	Coastal habitats provide the link between the land and the sea. They are dynamic, combine to form ecosystems of great complexity and provide significant areas for wildlife. Their landscapes are treasured by visitors, painters and musicians. They also provide locations for significant economic activity and are intimately bound up with fisheries, providing food and shelter for some species of commercially exploited fish stocks. The habitats themselves provide a buffer to tides and wave action, which may be particularly important in areas where relative sea level is rising and during storm periods. Managing these assets in the face of continuing pressure from human populations on a sustainable basis is a major task.
