Sommario/riassunto

Products from the wild, also known as non-timber forest products (NTFPs), are used as medicines, foods, spices, and a multitude of other purposes. They contribute substantially to rural livelihoods, generate revenue for companies and governments, and have a range of impacts on biodiversity conservation. However, there is little information available for those seeking to develop effective policy frameworks and regulation. This book addresses that shortage with information and recommendations on the drafting, content and implementation of NTFP policies, and the broader issues of gover
