Sommario/riassunto	The so-called Genesis Apocryphon (1Q20) from Qumran Cave 1 has suffered from decades of neglect, due in large part to its poor state of preservation. As part of a resurgent scholarly interest in the Apocryphon, and its prominent position among the Aramaic Dead Sea Scrolls, this volume presents a fresh transcription, translation, and extensive textual notes drawing on close study of the original manuscript, all available photographs, and previous publications. In addition, a detailed analysis of columns 13-15 and their relation to the

oft-cited parallel in the Book of Jubilees reveals a number of ways in which the two works differ, thereby highlighting several distinctive features of the Genesis Apocryphon. The result is a reliable text edition and a fuller understanding of the message conveyed by this fragmentary but fascinating retelling of Genesis.
