Sommario/riassunto

As the demand for data and information management continues to grow, so does the need to maintain and improve the security of databases, applications, and information systems. In order to effectively protect this data against evolving threats, an up-to-date understanding of the mechanisms for securing semantic Web technologies is essential. Reviewing cutting-edge developments, Secure Semantic Service-Oriented Systems focuses on confidentiality, privacy, trust, and integrity management for Web services. It demonstrates the breadth and depth of applications of these te

Sommario/riassunto

This groundbreaking study illuminates the Egyptian experience of modernity by critically analyzing the foremost medium through which it was articulated: history. The first comprehensive analysis of a Middle Eastern intellectual tradition, *Gatekeepers of the Past* examines a system of knowledge that replaced the intellectual and methodological conventions of Islamic historiography only at the very end of the nineteenth century. Covering more than one hundred years of mostly unexamined historical literature in Arabic, Yoav Di-Capua explores Egyptian historical thought, examines the careers of numerous critical historians, and traces this tradition's uneasy relationship with colonial forms of knowledge as well as with the post-colonial state.
