Sommario/riassunto

Regional trade agreements have expanded exponentially over the past decade, and have become a significant, if controversial, factor in the expanse of economic globalization. Social Regionalism in the Global Economy attempts to take a fresh, interdisciplinary approach to addressing labour regulation by drawing upon insights from industrial relations, comparative capitalism, and new governance schools of thought. It stands for the proposition that an interdisciplinary study of regional regulation holds the potential to offer a fuller account of social regionalism. Its focus is to co
