Sommario/riassunto	This book undertakes a critique of the pervasive notion that human beings are separate from and elevated above the nonhuman world and explores its role in the constitution of modernity. The book presents a socio-material analysis of the British milk industry in the late nineteenth and early twentieth centuries. It traces the dramatic

development of the milk trade from a cottage industry into a modernised and integrated system of production and distribution, examining the social, economic and political factors underpinning this transformation, and also highlighting the important
