Sommario/riassunto

"Very few people are aware of the significant negative impact that cluttering- a communication disorder which affects a person's ability to speak in a clear, concise and fluent manner- can have on one's life educationally, socially and vocationally. Although different from stuttering, it is often related to this more well-known disorder. This book treats cluttering as a serious communication disorder in its own right, providing an in-depth examination of the critical factors surrounding its assessment, treatment and research. Using evidence-based data as well as information regarding the assessment and treatment of cluttering within the field of speech-language pathology, the volume includes the latest research findings and work from leading worldwide cluttering experts. Current viewpoints regarding cluttering, along with substantiated evidence are provided. Research findings are presented regarding the nature and neurology of cluttering. A range of successful assessment and treatment methodologies are described in the context of disorders which may co-occur with cluttering, such as autism spectrum disorders, learning disabilities, Down Syndrome and stuttering. Future directions with regards to the definition, teaching and researching of cluttering are also addressed. Students, faculty members, researchers and clinicians in the field of speech pathology will find this book an essential and unique source of information on cluttering"--Provided by publisher.

Nota di contenuto	Foreland Basins; Contents; Preface; Foreland basins: an introduction; Circum-Pacific and Western Americas; Tectonic controls of foreland basin subsidence and Laramide style deformation, western United States; The stratigraphic and structural evolution of the central and eastern Magallanes Basin, southern South America; Magnetic polarity stratigraphy, age and tectonic setting of fluvial sediments in an eastern Andean foreland basin, San Juan Province, Argentina; The evolution of foreland basins to steady state: evidence from the western Taiwan foreland basin Timor-Tanimbar Trough: the foreland basin of the evolving Banda orogenAlpine basins of Europe and Asia; The Oligocene to Recent foreland basins of the northern Apennines; A small polyhistory foreland basin evolving in a context of oblique convergence: the Venetian basin (Chattian to Recent, Southern Alps, Italy); A comparison between a present-day (Taranto Gulf) and a Miocene (Irpinian Basin) foredeep of the Southern Apennines (Italy); Plio-Pleistocene sedimentation in the

Apenninic-Adriatic foredeep (Central Adriatic Sea, Italy); Dynamics of the Molasse Basin of western Switzerland
 Evolution of the north Alpine foreland basin in the Central Alps
 Thrust belt development in the eastern Pyrenees and related depositional sequences in the southern foreland basin; Thrust tectonic controls on Miocene alluvial distribution patterns, southern Pyrenees; Syntectonic intraformational unconformities in alluvial fan deposits, eastern Ebro Basin margins (NE Spain); Late Cenozoic tectonics and sedimentation in the north-western Himalayan foredeep: I. Thrust ramping and associated deformation in the Potwar region
 Late Cenozoic tectonics and sedimentation in the north-western Himalayan foredeep: II. Eastern limb of the Northwest Syntaxis and regional synthesis
 Palaeozoic of North America; Progressive filling of a confined Middle Ordovician foreland basin associated with the Taconic Orogeny, Quebec, Canada; Evolution from passive margin to foreland basin: the Atoka Formation of the Arkoma Basin, south-central U.S.A.; Sedimentary-tectonic development of the Marathon and Val Verde basins, West Texas, U.S.A.: a Permo-Carboniferous migrating foredeep
 On the depositional response to thrusting and lithospheric flexure: examples from the Appalachian and Rocky Mountain basins
 Petrography and stratigraphic techniques; Sedimentary 'signatures' of foreland basin assemblages: real or counterfeit?; Compositional trends within a clastic wedge adjacent to a fold-thrust belt: Indianola Group, central Utah, U.S.A.; Provenance modelling as a technique for analysing source terrane evolution and controls on foreland sedimentation; Reconstruction of patterns of differential subsidence using an episodic stratigraphic model

Sommario/riassunto

Firstly, this represents a collection of case-studies covering a wide range of basin types and tectonic and stratigraphic settings. Secondly, it highlights specific themes such as the history of subsidence and its relation to orogenesis, and the stratigraphic architecture of the basin fill.
