

1. Record Nr.	UNINA9910459017803321
Titolo	Addressing modernity [[electronic resource]] : social systems theory and U.S. cultures / / edited by Hannes Bergthaller and Carsten Schinko
Pubbl/distr/stampa	Amsterdam ; ; New York, : Rodopi, 2011
ISBN	1-282-99172-8 9786612991721 90-420-3258-8
Descrizione fisica	1 online resource (365 p.)
Collana	Postmodern studies ; ; 45
Altri autori (Persone)	BergthallerHannes SchinkoCarsten
Disciplina	306.0973
Soggetti	Civilization, Modern Social systems Culture Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Preliminary Material -- From National Cultures to the Semantics of Modern Society / Hannes Bergthaller and Carsten Schinko -- The Emergence of Literature as Art and the Refinement of Literary Perspective / Martin Klepper -- Reading the Waste Land: Textuality, Mediality, Modernity / Christoph Reinfandt -- Black Boxes and White Noise. Don DeLillo and the Reality of Literature / Edgar Landgraf -- Who is Afraid of Arnold Schwarzenegger? Absurd Democracy in the United States / Hans Georg Moeller -- The Semantics of Self-Denial: The New American Studies through the Lens of Luhmann's Social Systems Theory / Michael Boyden -- Nation of Speculation: The Constitution of a Financial Public in 19th Century America / Urs Staeheli -- Institutionalised Individualism. Parsons and Luhmann on American Society / Gert Verschraegen -- Why Did Luhmann's Social Systems Theory Find So Little Resonance in the United States of America? / Rodrigo Jokisch -- Drawing out the Reader: Tourism, Literature, Individuality / Ulrich Brinkmann -- Steps to an Ecology of Systems: Whole Earth and Systemic Holism / Bruce Clarke -- The System in the

Garden: American Studies and Functional Differentiation / Andrew McMurry -- World-Systems Colliding: Thomas Pynchon and Niklas Luhmann / Joseph Tabbi -- Luhmann, Literature, and American Multiculturalism / Carsten Schinko.

Sommario/riassunto

Niklas Luhmann's theory of social systems is one of the most ambitious attempts to create a coherent account of global modernity. Primarily interested in the fundamental structures of modern society, however, Luhmann himself paid relatively little attention to regional variations. The aim of this book is to seek out modernity in one particular location: The United States of America. Gathering essays from a group of cultural and literary scholars, sociologists, and philosophers, Addressing Modernity reassesses the claims of American exceptionalism by setting them in the context of Luhmann's conception of modernity, and explores how social systems theory can generate new perspectives on what has often been described as the first thoroughly modern nation. As a study of American society and culture from a Luhmannian vantage point, the book is of interest to scholars from both American Studies and social systems theory in general.

2. Record Nr.	UNINA9910830480303321
Titolo	Bacteria and Intracellularity / / edited by Pascale Cossart, Craig R. Roy, Philippe Sansonetti
Pubbl/distr/stampa	Washington, District of Columbia ; ; Hoboken, New Jersey : , : ASM Press : , : Wiley, , [2020] ©2020
ISBN	1-68367-354-9 1-68367-279-8 1-68367-026-4
Descrizione fisica	1 online resource (377 pages)
Disciplina	589.901
Soggetti	Bacteria - Physiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

Sommario/riassunto

"In launching this book, we wanted to cover many aspects and mechanisms of cellular microbiology, but more importantly, we intended to show that cellular microbiology as a field has reached maturity, extending beyond the strictly cellular level to infections of various organs and tissues. Many model organisms (*Yersinia*, *Salmonella*, *Shigella*, and *Listeria*, among others) are foodborne pathogens, and tremendous progress has been achieved in deciphering how, when, and where bacteria interact with the gut. However, intestinal cells and the intestine are not the only cells and organs discussed in this book. There are also chapters on infections of the urogenital tract, the endothelial barriers, the nervous system, and the lungs. Progress in the latter two concern important public health infections produced by *Mycobacterium leprae* and *Mycobacterium tuberculosis*. These two bacteria, which were at first much more difficult to manipulate than *Escherichia coli*, are now genetically tractable, and their study can now benefit from all the techniques and approaches established with less fastidious bacteria"--
