Sommario/riassunto

The New International Monetary System brings together twelve original contributions by leading scholars and practitioners to a conference convened in May 2008 on the occasion of the retirement of Alexander Swoboda. The contributions are arranged in three main parts. Part I deals with the international financial architecture, Part II examines the ever-controversial role of exchange rate regimes and Part III takes stock of the conduct of monetary policy and the challenges posed by the inflation-targeting strategy. The chapters provide considered assessments of virtually all the hotly d
