Sommario/riassunto	Medical Treatment of Glaucoma is the topic of the seventh World Glaucoma Association Consensus. Medical treatment of glaucoma continues to be at the core of glaucoma management. Hence, the results of this report will have broad and significant impact on glaucoma research and clinical practice. The global faculty, consisting of leading authorities on the clinical and scientific aspects of medical management, met in Fort Lauderdale on May 1, 2010 to discuss the reports and refine the consensus statements. As with prior meetings, it was a daunting task to seek and obtain consensus on such a c
