

1. Record Nr.	UNINA9910459130703321
Titolo	Osteoporosis [[electronic resource] /] / edited by Robert Marcus ... [et al.]
Pubbl/distr/stampa	Amsterdam ; ; Boston, : Elsevier/AP, 2013
ISBN	0-12-398252-9
Edizione	[4th ed.]
Descrizione fisica	1 online resource (2 volumes (xxv, 1995 pages, 18 unnumbered pages of plates)) : illustrations (chiefly color)
Altri autori (Persone)	MarcusRobert <1940->
Disciplina	616.7/16
Soggetti	Osteoporosis Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previous edition: 2008.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	V: 1 -- The bone organ system: form and function -- The nature of osteoporosis -- Reflections on osteoporosis -- Reflections on development of concepts of intercellular communication in bone -- Osteo-odyssey: a memoir -- Development of the skeleton -- The skeletal stem cell -- Osteoclast biology -- Osteoblast biology -- Osteocyte biology -- The regulatory role of matrix protein in mineralization of bone -- Parathyroid hormone and parathyroid hormone-related protein -- Vitamin D: biology, actions, and clinical implications -- Regulation of bone cell function by estrogens -- Androgens and skeletal biology: basic mechanisms -- Phosphatonins -- Skeletal growth factors -- Wnt signaling in skeletal homeostasis and diseases -- The mechanical behavior of bone -- Cellular and molecular mechanotransduction in bone -- Adaptation of skeletal structure to mechanical loading -- Biomechanics of hip and vertebral fractures -- Prevention of osteoporosis by physical signals: defining a potential role for nondrug strategies in the treatment of musculoskeletal injury and disease -- Epidemiologic methods in studies of osteoporosis -- Genetic determinants of osteoporosis -- Race, ethnicity, and osteoporosis -- Geographic variability in hip and vertebral fractures -- Nutrition and risk for osteoporosis -- Physical activity and exercise in the maintenance of the adult skeleton and the prevention of osteoporotic fractures -- Premenopausal reproductive and hormonal

characteristics and the risk for osteoporosis -- Clinical and epidemiological studies: skeletal changes across menopause -- Osteoporosis in men: epidemiology, pathophysiology, and clinical characterization -- Falls as risk factors for fracture -- Nonskeletal risk factors for osteoporosis and fractures -- Outcomes following osteoporotic fractures -- Skeletal heterogeneity and the purposes of bone remodeling: implications for the understanding of osteoporosis -- On the evolution and contemporary roles of bone remodeling -- Cytokines and the pathogenesis of osteoporosis -- Animal models for osteoporosis -- Bone and fat -- Bone mineral acquisition in utero and during infancy and childhood -- Bone acquisition in adolescence. V: 2 -- Osteoporosis in childhood and adolescence -- Osteoporosis associated with pregnancy -- Osteoporosis in premenopausal women -- Estrogen deficiency, postmenopausal osteoporosis, and age-related bone loss -- Immobilization osteoporosis -- Osteoporosis associated with illnesses and medications -- Glucocorticoid-induced osteoporosis -- Anticonvulsant-related bone disease -- Thyroid hormone and the skeleton -- The skeletal actions of parathyroid hormone in primary hyperparathyroidism and in osteoporosis -- Osteogenesis imperfecta and other defects of bone development as occasional causes of adult osteoporosis -- HIV and osteoporosis -- Obesity, diabetes, and fractures -- Osteoporosis in organ transplant patients -- Osteoporosis associated with rheumatologic disorders -- Osteoporosis associated with chronic kidney disease -- Oral bone loss and systemic osteoporosis: weighing the risk benefit ratio of treatment -- Cancer treatment-induced bone loss in patients with breast cancer: pathophysiology and clinical perspectives -- Pathophysiology-prostate cancer -- Mechanisms of bone destruction in myeloma -- Evaluation of the patient at risk for osteoporosis -- Imaging of osteoporosis -- Osteoporosis: who should be treated? Who should be screened? -- Clinical use of bone densitometry -- Biochemical markers of bone turnover in osteoporosis -- Fracture risk assessment: the development and application of FRAX® -- Orthopedic aspects of osteoporosis -- Falls prevention interventions -- Physical therapy, physical modalities, and exercise regimens in the management of osteoporosis -- Calcium in the treatment of osteoporosis -- Vitamin D and its metabolites and analogs in the management of osteoporosis -- Alternative therapy through nutrients and nutraceuticals -- Design considerations for clinical investigations of osteoporosis -- Lessons from bone histomorphometry on the mechanisms of action of osteoporosis drugs -- Estrogen and estrogen analogs for prevention and treatment of osteoporosis -- Androgens -- Calcitonin in osteoporosis -- Bisphosphonates: pharmacology and use in the treatment of osteoporosis -- Osteonecrosis of the jaw and atypical femoral fractures -- Condition critical: compliance and persistence with osteoporosis medications -- Denosumab for the treatment of osteoporosis -- Strontium ranelate in the prevention of osteoporotic fractures -- Parathyroid hormone treatment for osteoporosis -- New approaches to osteoporosis therapeutics -- The past, present, and uncertain future of therapeutic innovation in osteoporosis.
