

1. Record Nr.	UNINA9910459132303321
Titolo	Patterning and cell type specification in the developing CNS and PNS [[electronic resource] /] / editors-in-chief, John L.R. Rubenstein, Pasko Rakic
Pubbl/distr/stampa	Amsterdam ; ; Boston, : Elsevier/AP, 2013
ISBN	0-12-397348-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (993 p.)
Collana	Comprehensive developmental neuroscience
Altri autori (Persone)	RubensteinJohn L. R RakicPasko
Disciplina	612.8
Soggetti	Developmental neurobiology Nervous system - Diseases Neurological errors Nervous system - Diseases - Treatment Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section 1. Induction and patterning of the CNS and PNS -- section 2. Generation of neuronal diversity -- section 3. Development of glia, blood vessels, choroid plexus, immune cells in the nervous system.
Sommario/riassunto	The genetic, molecular, and cellular mechanisms of neural development are essential for understanding evolution and disorders of neural systems. Recent advances in genetic, molecular, and cell biological methods have generated a massive increase in new information, but there is a paucity of comprehensive and up-to-date syntheses, references, and historical perspectives on this important subject. The Comprehensive Developmental Neuroscience series is designed to fill this gap, offering the most thorough coverage of this field on the market today and addressing all aspects of how the n
