

1. Record Nr.	UNINA9910459193403321
Titolo	The economics of marine resources and conservation policy [[electronic resource]] : the Pacific halibut case study with commentary // edited by James A. Crutchfield and Arnold Zellner
Pubbl/distr/stampa	Chicago ; ; London, : University of Chicago Press, c2003
ISBN	1-282-64628-1 9786612646287 0-226-12197-6
Descrizione fisica	1 online resource (242 p.)
Altri autori (Persone)	CrutchfieldJames Andrew <1938-> ZellnerArnold
Disciplina	333.95/669516/091644
Soggetti	Pacific halibut fisheries - Economic aspects Pacific halibut - Conservation Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- CONTENTS -- Introduction and Overview -- ECONOMIC ASPECTS OF THE PACIFIC HALIBUT FISHERY -- 1 . Pacific Halibut Fishery -- 2. Theoretical Basis for Management -- 3. Objectives of Fishery Management -- 4. History of Regulation of the Halibut Fishery -- 5. General Effects of the Halibut Program -- 6. Analysis of Port Pricing of Halibut: Theoretical Considerations -- 7. Analysis of Port Pricing of Halibut: Empirical Results -- 8. Economic Survey of Boats and Fishermen -- 9. Economic Status of the Halibut Fishery -- 10. Summary of Economic Performance -- 11 . Policy Implications -- Appendixes -- 1 . The Crutchfield and Zellner Monograph and the Evolution of Environmental and Resource Economics David Zilberman -- 2. Price-Oriented Management and the Pacific Halibut -- 3. Crutchfield and Zellner on Exvessel Price Determination in the Pacific Halibut Fishery -- 4. The Halibut Fishery -- Index
Sommario/riassunto	How can we manage a so-called "renewable" natural resource such as a fishery when we don't know how renewable it really is? James A. Crutchfield and Arnold Zellner developed a dynamic and highly

successful economic approach to this problem, drawing on extensive data from the Pacific halibut industry. Although the U.S. Department of the Interior published a report about their findings in 1962, it had very limited distribution and is now long out of print. This book presents a complete reprint of Crutchfield and Zellner's pioneering study, together with a new introduction by the authors and four new papers by other scholars. These new studies cover the history of the Pacific halibut industry as well as the general and specific contributions of the original work-such as price-oriented conservation policy-to the fields of resource economics and management. The resulting volume integrates theory and practice in a clear, well-contextualized case study that will be important not just for environmental and resource economists, but also for leaders of industries dependent on any natural resource.
