Sommario/riassunto	This interdisciplinary collection by leading scholars in the field is dedicated to fascinating new insights into divination and oracles arising

from recent work in anthropology, religious studies, history and classical studies. Central importance is given to the practical and theoretical perspectives of diviners as well as scholars of divination; several contributors are both. This book explores philosophical issues such as the nature of divinatory intelligence, the relationship between divinatory and metaphorical truth, the primacy of ontology over epistemology, the importance of reflexivity
